PROFESSIONAL SUMMARY

Computer Science student majoring in Data Science with hands-on experience in full-stack web development, data analysis, artificial intelligence, and database management. Experienced in developing web applications using React, JavaScript, FastAPI, Flask, Supabase, Firebase, and MySQL, and performing data analysis using Python, Pandas, NumPy, Matplotlib, and SQL. Built and contributed to projects involving renewable energy decision support, customer churn analysis, and financial tracking.

EDUCATION

BS Computer Science Major in Data Science, University of Perpetual Help System DALTA Molino Campus; 2023 – 2027

- *Grade*: 1.34 GWA
- *Relevant Skills:* Data Analysis, Full Stack Development, Data Visualization

PROJECTS & EXPERIENCE

Autumn Assets

- Developed and maintained Autumn Assets, a full-stack web application for Coral Island players to track in-game farm income, expenses, and daily profit, built with JavaScript, HTML, CSS, Vite, and Firebase (Authentication + Cloud Firestore).
- Implemented 20+ application features/workflows across 3 layers: authentication (email/password, Google OAuth, Facebook OAuth, reCAPTCHA verification, session persistence, route protection, logout), data management (add entry with auto-calculated profit, real-time Firestore sync via onSnapshot, sortable history table, single-row delete, batch bulk-delete via writeBatch, CSV export), and visualization/UI (Plotly dual-line earnings-vs-expense chart, dark/light theme toggle with localStorage persistence, responsive layout).

LUMI — Data-Driven Environmental Intelligence System

- Developed an AI-assisted web application evaluating renewable energy potential across 1,700+ Philippine municipalities.
- Built React frontend interfaces and FastAPI backend APIs supporting 2 core application modules/features for data-driven renewable energy analysis.
- Processed and analyzed 5,000+ environmental and energy records — 1,813 municipality climate profiles and 42,000 barangays to support renewable energy decision-making.

LLOYDS BANKING GROUP — Customer Churn Analysis

- Completed Forage's Data Science Job Simulation in partnership with Lloyds Banking Group, covering the end-to-end data science workflow from data gathering to model deployment
- Performed exploratory data analysis on 8,056 customer records across 5 data sources (1,000 customers) to identify factors associated with customer churn.
- Analyzed 25 customer attributes/features to determine relationships between customer characteristics and churn behavior.

College of Computer Studies Council, Secretary & President; June 2024 – May 2025 & June 2026 - May 2027

- Prepared 20+ concept papers, proposals, letters, and administrative documents for student programs and activities.
- Coordinated 10+ events and student activities across student organizations and academic departments.
- Supported programs reaching approximately 350 students across the College of Computer Studies.
- Assisted in planning and executing technology-focused and student-development initiatives.

Junior Philippine Computer Society Council, Vice President; June 2025 – May 2026

- Coordinated 5 academic and technology-related programs involving students and faculty.
- Assisted in planning and executing 3 organizational initiatives/events throughout the academic year.

CERTIFICATIONS

IC3 Digital Literacy Certification

- Earned IC3 Global Standard Six (GS6) Level 1 certification covering 6 technology domains: technology basics, digital citizenship, information management, content creation, communication and collaboration, and safety and security

Information Technology Specialist: HTML and CSS

- Validates ability to design, structure, and style websites using HTML and CSS, following industry standards and best practices.

Information Technology Specialist: Python

- Earned Information Technology Specialist (ITS) certification in Python, demonstrating foundational programming skills and problem-solving proficiency
- Applied Python concepts including data types, control structures, functions, file I/O, and error handling to build functional programs

Datacom Partnering with AI in the Workplace — Datacom / Forage

- Completed Datacom's job simulation on Forage, partnering with generative AI tools (e.g., ChatGPT) across 4 project phases: research, report writing, design, and debugging

TECHNICAL SKILLS

Web Development: React, Vite, Tailwind CSS, HTML, CSS, JavaScript, FastAPI, Flask, Git, GitHub
Databases: Supabase, Firebase, MySQL
Data Analysis: Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), SQL
